

Microgeography of UK demographic change: 1991-2001

Quantify and map changes in population size and social characteristics occurring in UK's small geographical areas between the 1991 and 2001 Censuses

An UPTAP project c/o ERSC

Which demographic components account for change? Balance between natural change & migration change

Are areas becoming more or less deprived over time?

Re-estimate 1991 populations allowing for changes in geography & recent views of census undercount

Calculate consistent deprivation indicators over time. Emulate deprivation indexes more realistic as a goal than geodemographics
Townsend index: unemployment, household overcrowding, no car access & non-home ownership
